

Press release

DiagnOptics receives Health Canada approval for the AGE Reader.

Groningen, the Netherlands – March, 2011

DiagnOptics has received approval from Health Canada for the AGE Reader. This allows the Canadian distributor of the AGE Reader, Bescot Healthcare, to start the sale of the AGE Reader SU and CU in Canada.

Health Canada reviewed the safety, effectiveness and quality of the AGE Reader and granted DiagnOptics a medical device license for the AGE Reader. After receiving approval from the Russian authorities a few months ago, this approval means entry to another important market for DiagnOptics.

About DiagnOptics

DiagnOptics is the pioneer and inventor of cutting edge diagnostic devices that can non-invasively diagnose and assess the risk of diabetes and its complications. Its technological advance in detecting fluorescence of Advanced Glycation Endproducts (AGEs) has led to the invention of the AGE Reader - a state of art diagnostic device which can determine the tissue accumulation of AGEs in 30 seconds. Since the CE certification on the AGE Reader in 2006, DiagnOptics has been marketing this medical device to hundreds of clinics around the world. Currently the company is working on obtaining additional regulatory approvals in other regions and is engaged in new product development activities. The head office of DiagnOptics Technologies BV is in Groningen, the Netherlands. [Read more](#)

About AGE Reader

The AGE Reader is the answer to the need for measuring AGEs without the disadvantages of the existing methods. This state of art device provides a simple non-invasive solution which allows clinicians to determine the AGE level within 30 seconds. [Read more](#)

About Bescot Healthcare Canada

Bescot Healthcare Canada is focused on providing, or continuing to provide valuable healthcare products to Canadians, to aid in the diagnosis or treatment of their disease or disorder. [Read more](#)
